

### P.E.T. Polyester Staple and Filament Yarn Usages

Beaulieu offers a broad-range of residential carpets made from P.E.T. (polyethylene terephthalate) polyester that is obtained from post-consumer soft drink bottles and from virgin polymer. Currently, we use recycled P.E.T. to make our carpets made from staple polyester yarn, and virgin P.E.T. to make our carpets made from filament polyester yarn. Both recycled and virgin P.E.T. polyester yarn systems are very durable and inherently stain-resistant, are very colorfast to light, easy to clean and resistant to abrasion.
